**Worker shortage impact**

**Hikes costs, slows progress**

The nation is moving through the preliminary stages of completing the first part of more than $3.5 trillion in infrastructure projects. It’s been a decade-long stop to get everything positioned correctly to ensure the lanes sit paring on fixing roads, power lines and electric transmission systems and the myriad of other projects that needs to be repaired or replaced. But the human factor is lesser in the form of the death of experienced construction workers – will likely slow progress on

"Construction workforce shortages are acute and having a significant impact on construction forms of all types, all sizes and all trades," said Randi Weingarten, the American Federation of Labor and Congress of Industrial Organizations’ chief executive officer. "These workforce shortages are compounding the challenges we have with supply and price hikes that are resulting in the cost of materials and making delivery even more difficult. A workforce survey conducted by the AFL-CIO and AIA show that ‘construction lacks a reliable pipeline of young professionals, union and contractor apprentices in numbers. Along with moving to make sure our clean energy grids, this plan has expanded" (Continued on Page 2)

**A good plan, and can help protect stop, study plans**

**Biden puts thumb on scale to give IBEW charging network**

The lack of building a national network of electric vehicle charging stations could stall an estimated 1.3 million U.S. construction firms, undermining the industry’s ability to complete projects on time and schedule and threaten the economic investments in infrastructure and the environment.

The AFL-CIO’s 919,000-member union has open positions they are trying to fill. Among the 60-80 construction workers toiling for general contractor Rockford Construction, its subcontractors, getting the facility ready for an early 2023 opening. Among the electricians on the job, working in the new 5,263-seat theater, are (l-r) Anthony Maic, Todd Demorest and Scott Comment of IBEW Local 58. They’re employed by Centerline Electric.

Detroit is one of some 60-90 construction workers tackling general contractor Rockford Construction and their subcontractors, getting the facility ready for an early 2023 opening. Among the electricians on the job, working in the new 5,133-seat theater, are (l-r) Anthony Maic, Todd Demorest and Scott Comment of IBEW Local 58. They’re employed by Centerline Electric.

BCEL celebrates Delta Energy Park

(Continued from Page 1)

The door to tremendous regional economic growth opportunity, such as BCEL being the catalyst for the State of Michigan and General Motors to locate GM’s $2.5 billion electric vehicle battery plant just a few miles down the road. The company is also destined in ongoing conversations with new, large industrial customers looking to build in Lansing. The Lansing Economic Study at the end of this year “means we’ll be out of the soul search,” Pullard said. Pullard’s retirement will make the BCEL the largest utility in Michigan to generate coal-free power by 2022, reducing its carbon emissions by 50 percent.

The Delta Energy Park plant went operational on March 16, 2022. The plant has combustion turbines capable of 17 megawatts each and one steam turbine generating capability of 9 megawatts. The plant took 1.4 million labor-hours to erect, which included laying 50,000 cubic yards of concrete, 18 miles of mechanical piping, 20,000 miles of electrical cabling, and 20,000 hours of operator training.

Delta Energy Park was built by a combination of local and national firms, including:

• Construction Manager – Lansing Power Constructors, a joint venture between Lansing

Chicken-feed pay from Chick-fil-A

For more than 30 years, CPW has represented thousands of Michigan union workers in lawsuits against the asbestos industry. We can arrange a free chest-x-ray review by a NIOSH Certified BReader to all qualified building tradesmen with start dates prior to 1980. Please don’t delay, protect yourself and your family before it’s too late. No recovery fee.”

We are considered the Very Best Mesothelioma Attorneys in Michigan for good reason-our results speak for themselves.
Approval of nation's unions nears record high

(Bidens put thumb on scale to gauge IBEW's charging jobs)

Former President Joe Biden, speaking during a visit to the headquarters of the International Brotherhood of Electrical Workers on Thursday, held a news conference with union leaders to announce that the IBEW has been awarded the right to represent workers in the electric vehicle industry. The union has long advocated for the right to organize in the sector.

The move comes after a long battle with the National Labor Relations Board, which in 2021 refused to recognize the union in a vote. Biden, who has been a strong supporter of unions, issued an executive order requiring the NLRB to conduct new elections in cases where the agency's actions were found to be unfair.

The IBEW said in a statement that the deal was a major victory for the union and a significant step forward for workers in the electric vehicle industry. "This is a major victory for workers and for the future of our economy," said John Durso, the union's president.

The agreement covers around 1,000 workers at two facilities in Michigan, including a Tesla plant in Kalamazoo and a Ford facility in Dearborn. The deal includes provisions for higher wages, better benefits, and improved working conditions.

Biden, who has been a strong advocate for union rights, said the agreement was a "fitting" way to "celebrate" Labor Day and a "new chapter" in the country's labor history.

"We need to work together to make sure that workers have the right to join together, to fight for better wages, better benefits, and better working conditions," Biden said.

The agreement also includes a provision that will allow the union to represent workers at other facilities in the electric vehicle industry. This is a major development, as the industry is rapidly expanding and is expected to create thousands of new jobs in the coming years.

The union has been working for years to organize workers in the electric vehicle industry, and the agreement is a major victory for the movement. The union has been increasingly successful in recent years, and has won several high-profile organizing campaigns.

The agreement with the IBEW is a significant step forward for the union, and a major victory for workers in the electric vehicle industry. The deal sets a new standard for workers in the sector, and is a fitting way to "celebrate" Labor Day.

The course is free online, so you must take the course, please contact the Local Union Office with your email address and we will be happy to you set up your course. If you do not have a computer at home, you are welcome to come to the Local Union Office to take the course.

To ensure all Active Members and Retirees are receiving their Roe calls please make sure you have not blocked the following number: 844-483-8636. There are several members who have this phone number blocked and are not receiving our Roe calls.

These calls are only for important Notifications for the Local Union Business Manager and Funeral Notifications. If you are not receiving these calls, please contact the Local Union Office and we will double check to make sure we have the correct member in the system or if you may have blocked the number.

Local 47 of the Heat and Frost Insulators has new phone numbers in place. We ask that if you have a change of address or phone number to visit the Local Union Office right now that you notify us so we can update your information through your system, TUC, and the with the International to make sure your membership information is always updated with Local 47.

LARKIN to recognize and congratulate our Local 47 members on their achievements. We want to thank everyone so many compliments on all the recent achievements. We want to recognize the following members for their dedication and hard work:

MEACHER:

Work in both areas of the region will be

LABOR DAY in Detroit didn’t feature a parade this year, but Local 149 and Elevator Constructors Local 36 celebrated the holiday in the Local 149 parking lot. The event featured food, games and prizes. Among those heading to get the union hall ready for the celebration (left) were Workers Jim Creo, Joe Gilliom, Gary Johnson, and Business Manager Brian Gregg.

Local 149 Union Hall location at 120 N. Thomas Street, Bay City, MI. 7:30 am Registration – 8:30 AM. Labour Day Picnic was a huge success! Business Union Hall in Escanaba with food, games, and prizes. Among those heading to get the union hall ready for the celebration (left) were Workers Jim Creo, Joe Gilliom, Gary Johnson, and Business Manager Brian Gregg.
Trades set new stage for performing arts at WSU

(Continued from Page 1) and the arts have been closely involved with the University’s Hillbary Theatre, said Roy Wilson, chair of the Maggie Allesio Department of Theatre and Dance at Wayne State University. "A new 3,500-space processes theatre with a wide stage and modern design, "is a showstopper," he said, "one of the most impressive I’ve seen around our area." Theatre, which is on the site and has been the home of graduate student theatre productions since 1963.

After several years of planning for the creation of new space adjacent to the current buildings, the Wayne State Board of Governors green-lighted construction renovation of Hillbary Theatre.

"A new 3,500-space processes theatre with a wide stage and modern design, "is a showstopper," he said, "one of the most impressive I’ve seen around our area."

Amalio said about 60-80 trades people work on the job around," she said. "The site office recognizes the temporary trades people that are working on the job and the project is creating about 100 new union jobs." The project is expected to be complete in spring 2022.

In order to improve wildlife management, the Department of Natural Resources (DNR) is encouraging hunters to participate in online harvest reporting. This system will help increase the accuracy of data collection, which is crucial for understanding population trends and making informed conservation decisions.

Brian Frawley, the DNR’s wildlife biologist who manages the department’s harvest program, expressed the need for accurate reporting. “The decline in response rate is one of the most significant reasons the department is moving to online harvest reporting, but one of the most important reasons is more precise data,” Frawley said. “If we don’t get accurate data, we need to change the process.”

Frawley noted that in the past, hunters were required to mail in information, which could lead to inaccuracies in data collection. “If you don’t report your harvest, that data is lost,” he explained. “If you don’t report your harvest, that data is not known to the department, and therefore is not available for analysis.”

Starting with the fall 2022 deer season, online harvest reporting is required for all hunters who take a deer in Michigan. “This is required for all hunters who take a deer in Michigan,” Frawley said. “It’s a change that’s been coming for a while.”

The move to online reporting is aimed at improving response rates and ensuring that all hunters are submitting their information. “The DNR is not able to count all hunters because of the vast number of hunters who participate,” Frawley said. “By making reporting online, we can increase the amount of accurate data we receive.”

Online harvest reporting is also intended to streamline the reporting process for hunters. “Instead of waiting for the hunter to mail in their information, we can process it online in real-time,” Frawley said. “This will allow us to get data quicker and ensure that it is accurate.”

The new online reporting system will be available through an app available on the Apple App Store. “The app – an even faster option – will be available in the fall,” Frawley said. “We encourage hunters to download it and start using it.”

Frawley also stressed the importance of confidentiality and privacy for hunters. “We want to make sure that information is kept confidential and that it is not shared with other entities,” he said. “We want to ensure that hunters feel comfortable reporting their harvest online.”

Online harvest reporting is also intended to help with surveillance and the ability to track returns over time so we can adapt management guidelines to better align with harvest numbers. That makes better overall management recommendations for Michigan’s deer population.

The move to required online harvest reporting, like any change, will take some time for people to embrace as part of the Michigan hunting experience, but the DNR is confident in the case of reporting and the benefits of better data will outweigh any initial concerns some may have. This first year will be all about familiarizing hunters with the new reporting requirement.

“However, we are Michigan’s deer hunters care about quality hunting opportunities and healthy deer herds,” said Frawley. “Each online harvest report will be a few minutes to provide critical information about hunting experiences and deer abundance all over the state.”

A reminder: The Uniform Natural Resources Code requires the reporting of all deer harvest. Deer hunters are encouraged to participate in the online harvest reporting system. If you do not participate in the online harvest reporting system, you will be assessed a $25 Late Fee for each deer harvest report that is not completed and signed. The $25 Late Fee will be added to your DNR bill and paid in addition to the deer harvest fee.

Reminder: Be sure to keep the local DNR UPW monitored with any changes to your phone number, address, email address, etc.

Members can now Pay Dues online 24/7 on our website at www.labour1191.org. Apple App Store.
